Summary

Information Systems student and Full-Stack .NET Developer with hands-on experience building scalable web applications using ASP.NET Core, SQL Server, React, and Next.js. Strong foundation in backend development, database design, OOP, and problem solving, with interest in software architecture and fintech systems.

Experience

NET Team Leader Trainee *Digital Egypt Pioneers* June 2025 - December 2025

- Led a team of developers in .NET projects, mentoring junior members.
- Coordinated with project managers to ensure timely delivery of software solutions.
- Conducted code reviews, ensuring adherence to best practices.

Full-Stack .NET Internship *Digital Egypt Pioneers* June 2025 - December 2025

- Completed comprehensive training in the .NET ecosystem, ASP.NET Core, and modern web development principles.
- Contributed to real-world projects utilizing agile methodologies and team collaboration, delivering functional software components.

Frontend Developer Intern *elevo pathway* August 2025 - September 2025

- Developed responsive web applications utilizing modern frontend technologies, enhancing user accessibility across devices.
- Implemented user interface designs, prioritizing user experience and intuitive navigation.

Database Designer Intern *mylerz.co* August 2025 - September 2025

- Designed and optimized database schemas for enterprise applications, improving data integrity and retrieval efficiency.
- Implemented data modeling and normalization techniques

Projects

Clouthes Store – Full-Stack E-Commerce Platform 🛠️ Built a scalable full-stack e-commerce platform using ASP.NET Core, Next.js, SQL Server, and Redis following Clean Architecture and CQRS principles. Implemented authentication, Stripe payment integration, cart persistence, and responsive modern UI. Tech Stack: ASP.NET Core, EF Core, SQL Server, Redis, Next.js, TypeScript, Tailwind CSS, MediatR.

MUST PHARMA – Full-Stack Pharmacy & Supplement Management System

🛠️ Developed a pharmacy and supplement management platform using ASP.NET Core 8 Web API, React, and SQL Server. Implemented JWT authentication, role-based authorization, Stripe integration, Redis caching, and RESTful APIs using Repository Pattern principles. Tech Stack: ASP.NET Core 8, C#, SQL Server, React, Tailwind CSS, Redis, Docker, Stripe API.

Stock Trading & Portfolio Management System 🛠️ Developed a stock trading simulation system in C# implementing OOP principles, Delegates, Events, and Operator Overloading. Built features for stock price simulation, portfolio management, trade execution, and real-time event-driven notifications using clean modular architecture. Technologies: C#, OOP, Events & Delegates, Data Structures.

Education

Misr University for Science & Technology
BSc in Information Systems

Skills

• C# • C++ • Java • Python • SQL • JavaScript • TypeScript • HTML5 • CSS3/ SASS • Bootstrap • React.js • ASP.NET Core • PHP • REST APIs • MySQL • SQL Server • Entity Framework • Database Design • Normalization • Git • GitHub • Visual Studio • VS Code • SQL Server Management Studio • Postman • OOP • SOLID Principles • Design Patterns • Clean Code • Agile Methodology • Scrum • Full-Stack Development • Leadership & Team Management • Communication & Public Speaking • Problem Solving & Analytical Thinking • Project Planning & Time Management • Adaptability & Continuous Learning

Certifications

Intro to Cybersecurity
Cisco - 2024-05

Full-Stack Development
SBS Student - 2024-05

Software Engineering Workshop
Route Academy - 2024-05

Languages

• Arabic • English

Bank Management System 🗄️ Desktop application for comprehensive bank operations management. Features: account management, transaction handling, financial reporting, user authentication. Implemented Object-Oriented Programming principles with secure data handling. Technologies: C++, OOP concepts, file handling, data structures

Employee & Client Management System 🗄️ Console application for efficient management of employees and clients. Features: data validation, search functionality, reporting, modular architecture. Implemented CRUD operations with efficient data storage and retrieval. Technologies: C++, modular programming, data structures, file I/O

Achievements

ICPC Problem Solving Competition Participant

Level 2 Problem Solving Certification in C++
